

THE FINAL TAPE

Prop Journal Scorecard

Evaluate any spreadsheet or software before funded capital

6 essential fields

Field	Pass	Fail
Static risk (\$)	Starting balance every trade	Current equity
Phase label	Eval/funded/personal per row	Mixed phases
Setup name	Fixed named setups	Blank / misc
Compliance %	At entry, before outcome	After P&L known
Outcome in R	$P\&L \div \text{planned risk}$	Dollars only
Behavior tags	Dropdown labels	Free text

Scorecard (fail >2 = blind spots likely)

- Separate portfolio per phase
- Static risk auto-inherited
- Named setups + scorable checklists
- R from planned risk
- Rankable tags on losers
- Filter compliance in <10 sec

Red flags

- Replay-first, no checklist scores
- Default compounding on eval
- No setup object
- Tag chaos
- Blended eval + funded books
- P&L-only summaries

Broker vs journal

- **Broker:** Fills, limits — not why you approach the limit
- **Journal:** Compliance, R, tags — not hard stops
